NZ Citizen

SKILLS BRIEF

- Full-stack web & mobile
- AWS Cloud Services, DevOps, Pipelines
- Ruby on Rails
- HTML & CSS
- Bootstrap
- Javascript
- Databases, APIs, & Data
- Git / Github / Bitbucket
- React & Redux
- Node.js / Express
- Stripe payments
- Wireframing / Design
- Business & UX Analysis
- Project / Programme delivery
- Product & Technology Governance
- Agile practices & tooling

OVERVIEW

I enjoy technology and people, especially when applied to smart business and meaningful services. This could be developing a product or enhancement, configuring a solution, eliciting and reflecting requirements, goals & constraints, helping design a great user experience and application flow, or simply helping others learn, enjoy & create. I love building, solving, and learning new things, but mostly enjoy working with teams where we all grow, learn, and create great outcomes. Coffee?

EXPERIENCE

Resn Digital - *Technical Director - Development, Infrastructure, Integration & Operations*

Sept 2020 - Present (Contract / Freelance)

- Technology investigation and solution design, scoping and sizing - pre-sales, pre-development
